

20 months postdoctoral or postgraduate position in Mathematical Biology

In the Mathematical Biology Group at the Centro de Matemática e Aplicações Fundamentais (CMAF) at Lisbon University, Portugal, we offer a Postdoctoral or Postgraduate position in "Modeling the epidemiology of infectious diseases" for the European Union Project EPIWORK for 20 months or until the end of the project in January 2013. Payment will be in accordance with EU regulations and national scales permitted by FFCUL, depending on the academic experience of the candidate.

The candidate is expected to work with mathematical models of disease spreading, social network structures, stochastic systems and general complexity theories. The background of the candidate may be mathematics, theoretical physics (statistical physics preferred) or quantitative biology/medicine. Management skills as necessary for working in large scale EU-project are desired. The candidate should be fluent in English, since this is the language used in the Mathematical Biology Group as well as in the EU-project EPIWORK. Candidates from all Nationalities are welcome.

The position should be filled as soon as 1.3.2011 on a first come, first serve basis after inspection of CV and an interview. Candidates are welcome to apply immediately.

Please, send your application to Nico Stollenwerk,
nico@ptmat.fc.ul.pt.
