

Mês de: ABRIL 2014

PALESTRA

Dia 29 de Abril (terça-feira), às 17h, na FCUL, Edifício C6, Sala 6.2.42

Formas & Formulas in Ciência

Assunta Bonanno
(Università della Calabria, Italia)

Abstract:

Mathematical language and mathematical skills remain a fundamental prerequisite for learning other subjects, such as physics and sciences in general. Currently the overall guidelines relating to all levels of education, focus on the need to stretch the boundaries, till now over defined and often artificial, between mathematics and the most applicative sciences. The main objective is to enable learners to immediately grasp the most engaging, significant and surprising consequences of mathematical theory development in various sectors of applied sciences. The seminar presents some learning paths, focused on this specific purpose.
