GRUPO DE TRABALHO EM QUESTÕES LÓGICAS (GTQL/WGLQ)

Dia 17 de Junho (quinta-feira), às 14h, na Sala B1-01

“The method of local predicativity”

Sergei Tupailo

(CMAF)

Abstract:

By my colleagues' request, I will review my old work dealing with the method of Local Predicativity. This method is the main and most advanced tool in ordinal analysis of impredicative theories, which was a hot topic in Proof Theory up to the beginning of 2000-es. Exactly, in one or two sessions I will go through Sections 1 and 2 of the attached paper, based on my Stanford PhD thesis. Participants are requested to read, before the seminars, at least the Introduction to the paper.
