GRUPO DE TRABALHO EM QUESTÕES LÓGICAS (GTQL/WGLQ)

Dia 18 de Março (quinta-feira), às 14h, na Sala A2-25

"On the consistency of NF"

(continuation from the GTQL seminar of March 4)

ANTÓNIO FERNANDES

(CMAF)

Abstract:

The consistency of Quine's system of set theory, NF ("New Foundations"), relative to ZFC, is a question that remains open since 1937.

In this seminar I will describe a candidate for such a proof.

A word of warning: I'm heartily convinced that the proof is at some point faulty (although this is not a conviction grounded on mathematical evidence).
