**GRUPO DE TRABALHO EM QUESTÕES LÓGICAS (GTQL/WGLQ)**

**Dia 25 de Novembro (quinta-feira), às 15h, na Sala A2-25**

“ON INTUITIONISTIC NF”

***Sergei Tupailo***

(CMAF)

**Abstract:**

In a series of 2 or more talks I will present my latest attempts to save something of António Fernandes' ideas as to Consis (NF) proof presented last spring. Even though Extensionality and Ambiguity are true in my Kripke model, the amount of Comprehension I can prove to hold is severely restricted. Good ideas from the participants of the seminar on how to improve the envisageable result are most welcome.

In order to remind the scenery, in the first talk I will go through António's approach (in my terminology). After that, I will move on to what I was able to do.

Written texts will be provided to participants of the seminars.

To start, in the first session of November 25 we will discuss possible activities for this academic year, and I will give some suggestions.
