Dia 5 de Julho (quinta-feira), às 15h, na Sala B3-01

On dense orbits of flows and maps.

Roman Hric

(Matej Bel University, Banska Bystrica-Slovakia)

Abstract:

I mention some problems concerning (weak) transitivity and minimality of flows and maps. Among others I present new results about connection between existence of dense orbits of a flow and its corresponding t-maps from a joint work with Lubomir Snoha.
