SEMINÁRIO DE TEORIA DOS MODELOS

Dia 21 de Outubro (quinta-feira), às 15h, na Sala A2-25

“Generic Stability”

ALEX USVYATSOV

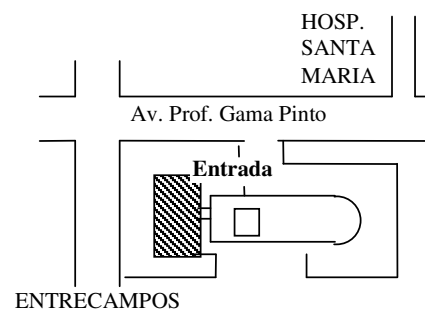

(CMAF UNIVERSIDADE DE LISBOA, PORTUGAL)

Abstract:

It turns out that a lot of stability theory can be reconstructed when working locally with types which exemplify stable behavior generically. Such types occur in many concrete unstable theories, such as ACVF and other theories of valued fields. I will speak about generically stable types in an arbitrary theory and their basic properties, especially with respect to forking.
