Dia 29 de Setembro (quarta-feira), às 15h, na Sala A2-25

“Towards a preparation theorem for definable functions in some
o-minimal structures”

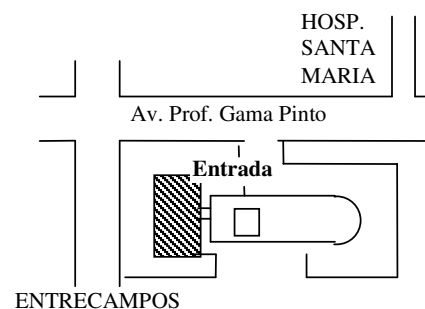

J.-P. ROLIN

(UNIVERSITÉ DE BOURGOGNE, FRANÇA)

Abstract:

This talk will be an informal presentation of a starting program involving some people from the Mathematical Logic Group in Lisbon, and from the I.M.B. in Dijon. The main goal of this program is the study of the properties of o-minimal structures generated by quasianalytic algebras of real valued functions. A precise knowledge of the behavior of the definable functions in such structures can be very useful for some applications in dynamical systems.
